*Warrior  
Lacrosse  
2012*

Warrior was born on the streets of Metro Detroit.

There's some grit on us from that & we like it.

We will never apologize for who we are or where we are from. We are going to do this thing our way.

We will always choose to blaze a new trail instead of following the pack because we like it when things get hard.... it makes us stronger.

Lacrosse is not for the weak & the 2011-12 equipment in this catalog represents the strongest product line that we have ever created.

You only get one shot in this game .... so make it count

# Heads

## Head Technologies

### 2SHOT MOLDING :

WHAT IS IT? A molding technique that allows us to inject 2 or more colors into a lacrosse head.

WHAT IT DOES: Found in Warrior's new EVOLUTION 3 head, the 2 shot process allows us to offer multi colored custom lacrosse heads straight from the factory. Coordinate the look of your head to match your team or stand out from the rest with a totally unique color scheme. The 2nd shot also helps add flare to in inside wall of the head giving you better hold on the ball.

### INSERT MOLDING :

WHAT IS IT? A patented process to insert a pre molded part into a head.

WHAT IT DOES: Found in Warrior's new EVOLUTION 3 & COBRA heads this insert molding technique was used to stiffen and reinforce the throat area for the ultimate in control and accuracy. It also allows us to mold a separate color into a head for a totally unique and custom look to your head.

### NOZ - GAS ASSIST:

WHAT IS IT? A patented process for injecting a lacrosse head with Nitrogen gas

WHAT IT DOES: By infusing a head with Nitrogen gas we are able create the lightest lacrosse head on the planet, without any significant changes to the overall durability of the head. This season, technology expands into the all new NEMESIS NOZ goalie head.

### DOUBLE BAR OFFSET (PATENT PENDING)

WHAT IS IT? It's the split in the top rail as it transitions from the throat into the sidewall of a lacrosse head.

WHAT IT DOES: The bottom section of a lacrosse head is the area most prone to flex. By creating a double bar on the top rail at this key flex point you not only limit the amount of flex but you also reduce the overall weight. The double bar offset also provides you with the maximum offset to a lacrosse head giving you lowest possible pocket and the best ball control.

### FLARE PATENT

WHAT IS IT? The inward pinch of the sidewall as you move from the top rail to the bottom.

WHAT IT DOES: Warrior Flare design creates an open catching area on the face of the head with an extreme back rail pinch that keeps the ball centered in the pocket and helps prevent it from coming out. The Flare gives you increased ball control while cradling and more accuracy when shooting and passing.

### NCAA HEADS

X6 AND X SPEC

	EMPEROR X6	EVO PRO X6	COBRA X	VICE X	EVOLUTION 3X	M80 X	EVOLYTE X	RAZER X	EVO X	REVO X	SWARM X

### FACE SHAPE SCALE

- 1

2

3

4

5
- WIDE
- TIGHTER
- TIGHTEST

- Tighter heads give you more pocket control, better ball retention and better accuracy.
- More open heads have more catching area for picking off passes and are easier for ground ball pickups.

### WEIGHT SCALE

- 1

2

3

4

5
- LIGHT
- LIGHTER
- LIGHTEST

- Lighter heads give you quicker release out of the pocket, faster checks on defense, and better overall feel on your stick.
- Heavier heads on the spectrum allow for harder checks on defense.

### STIFFNESS SCALE

- 1

2

3

4

5
- FLEXIBLE
- STIFF
- STIFFEST

- Stiffer heads give you more consistency on your release, better accuracy, and harder checks.
- More flexible heads give you better feel in your pocket when cradling.

# EVOLUTION 3 / EVOLUTION 3 X

- The ultimate in stock color options featuring a 3 zoned colored head
- New aggressive sidewall design featuring our 2 SHOT mold process for increased durability and stiffness
- Insert molded throat jewel for an additional color zone on the EVOLUTION 3
- New SLIM SCOOP allows for better transition in and out of the pocket
- Optimal string hole position for a pocket that strings up perfect every time.
- Available in 7 STOCK color ways
- Available in 2 specs = (HS) High school & (X) Universal

## HS SPEC:

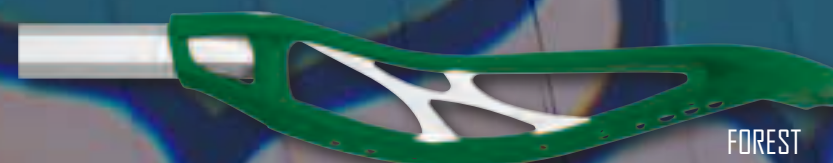

- Unstrung: EV3UN
- Players Pocket (HM): EV3PP

# EMPEROR / EMPEROR X6

- The EMPEROR was designed with some of the latest technology in heads to create the ultimate in performance lacrosse heads
- Uses Warrior's patented gas assist "NOZ" molding technique to achieve one of the lightest heads in lacrosse
- The sidewall design maximizes stiffness in the bottom 1/3 section of a head – where you need stability
- One of the tightest head shapes available for better ball control and more consistent release
- New slimmer scoop design allows for easy ground ball pickups
- Available in 2 specs = (HS) High school & (X6) NCAA only

## HS SPEC:

- Unstrung: EMPUN
- Players Pocket (HM): EMPPP

## X6 SPEC:

## VICE X

- The VICE X head has a mid pinch to the sidewall that squeezes the pocket and channels the ball through the center of the head
- By channeling the ball through the center you gain accuracy and power on your shots and passes.
- The shorter throat design allows your hands to be as close to your head as possible and gives you more control when you are cradling
- Available in 1 spec only = (X) Universal

### X SPEC:

- Unstrung: VCXUN
- Players Pocket (HM): VCXPP

## M80 X

- NEW for 2012 - The M80 X head has a double X sidewall design that gives you the best stiffness and durability at key flex points at the top and bottom of the head
- The face shape is perfect for creating a channel in the pocket for superior accuracy on your release
- The reinforced scoop design gives you a durable scoop that can scoop up ground balls and throw mean poke checks
- Available in 1 spec only = (X) Universal

### X SPEC:

- Unstrung: M80XUN
- Players Pocket (HM): M80XPP

AND BALL GOES THE DYNAMITE

# RAZER / RAZER X

- Longer head shape allows for a delayed release time from the pocket and generates more power on shots
- Features Warrior's patented Flared Sidewall gives you the tightest pinch in the game and keeps the ball centered in the pocket
- Patented TruOffset Technology creates a lowered pocket that generates extra power on shots and more ball control
- Available in 2 specs = (HS) High school & (X) Universal

## HS SPEC:

- Unstrung: RAZ2UN
- Players Pocket (HM): RAZ2PP

## X SPEC:

- Unstrung: RAXUN
- Players Pocket (HM): RAXPP

# REVO PRO

- Double Bar Offset gives you the most offset in the game and also controls flex in the head
- Features Warrior's patented Flared Sidewall gives you the tightest pinch in the game and keeps the ball centered in the pocket
- The Revo Pro is our most durable model and is built for handing out the beat down.
- Pro-Player developed and tested by some of the best defensemen in the MLL
- Available in 1 spec = (HS) High school only

## HS SPEC:

- Unstrung: RV2UN
- Players Pocket (HM): RV2PP

# EVOLYTE / EVOLYTE X

- EVOLYTE = It's the upgraded superlight, gas injected version of the original EVOLUTION head
- Uses Warrior's patented gas assist "NOZ" molding technique to create one of the lightest heads on the market
- By injecting NOZ (nitrogen) gas into the head during the molding process we are able to lower the overall weight by over 14%
- This insanely light weight gives you quicker releases on passes, shots & checks
- Patented TruOffset Technology creates a lowered pocket that generates extra power on shots and more ball control
- Available in 2 specs = (HS) High school & (X) Universal

## HS SPEC:

- Unstrung: EVLUN
- Players Pocket (HM): EVLPP

## X SPEC:

- Unstrung: ELXUN
- Players Pocket (HM): ELXPP

# EVO / EVO X

- The original badboy and the best selling Warrior head of all time
- V shaped face design that allows for larger catching area at the top of the head and a narrow bottom section for superior ball control
- Open sidewall design makes this head extremely lightweight
- Features Warrior's EZ scoop for the easiest ground ball pickups
- Patented TruOffset Technology creates a lowered pocket that generates extra power on shots and more ball control
- Now available in 10 STOCK color ways
- Available in 2 specs = (HS) High school & (X) Universal

# WARRIOR HANDLES

*The foundation of Domination.*

## TITANIUM SERIES:

Warrior's Titanium handles revolutionized lacrosse back in 1992 by providing a lightweight, ultra durable alternative to traditional aluminum lacrosse handles. The Warrior's Titanium handles still command the most respect in the game by using only premium, aero-space grade titanium in all of our handles.

## DOLOMITE SERIES:

We combined the strength of Titanium with the extreme lightweight properties of the Krypto Pro handles to create one of the baddest handle series on the planet. Warrior's exclusive Altium Alloy used in the Dolomite series sets new standards for strength to weight ratio in handles. Super Tough, Super Light, all hail the Warrior Dolomite.

## KRYPTO PRO SERIES:

Light weight. Feather weight. Krypto Pro. This series of handles is built around one simple concept, provide players with the lightest handles on the planet. The Krypto Pro handles were built for the top lacrosse players in the world. Made from high grade 7150 grade aluminum alloy, they are the preferred handles in both the MLL and College lacrosse.

## KRYPTOLYTE SERIES:

Without a doubt, the most popular handle series in lacrosse is the Kryptolyte Series. Lightweight, strong, and dead sexy – everything you want in a lacrosse handle without all of the fuss. Made from high grade 7075 aluminum alloy and formed into Warrior's exclusive Kung Fu grip.

## COMPOSITE SERIES:

Full length carbon composite shafts and graphics are for players looking for the ultimate in grip & performance. The grip coatings on our composite shafts give you the best control and ball control while cradling. Aggressive full length graphics add some swagger to your game.

## PLATINUM SERIES:

Twice as strong as your standard aluminum handle, the Platinum Series of handles are the next step for beginner players who are looking to take their game to the next level. Made from a durable 7000 grade aluminum the Platinum handles can both take and give big checks with the best of them.

Uplow  
Technology

## NEW FIT PATTERNS:

Your gloves are an extension of your hands when you play. If your gloves fit right you shouldn't even notice them. Warrior is aggressively pursuing a variety of glove fit patterns. These patterns have been strategically engineered for maximum flexibility and protection while minimizing the overall weight in the glove. They are also designed for the ultimate in comfort and to give you the best touch on your stick. There are a variety of different fit patterns to choose from so customize the feel to fit your playing style.

Uplow

### DIAMOND BACKHAND

New Patented backhand design that maximized venting and flexibility in a lacrosse glove  
Break-lines in the pattern are oriented in the way your hand bends and moves while cradling (found on the REGULATOR glove)

### 4V BACKHAND

Our most flexible fitting pattern  
Increased venting in the back hand to maximize airflow directly to your hand  
(found on the ELEKTRIK 2 glove)

### 2V BACKHAND

A tighter fit with increased protection  
Large foam blocks for increased protection  
(found on the WRATH and RIOT glove)

### 4BAR BACKHAND

4 bar design maximizes protection and flexibility  
Great pattern for beginners that are learning to throw, catch and cradle  
(found on the HYPNO 3 glove)

## VAPOR VENT AIRFLOW:

A patented technology found on ALL Warrior gloves, this technology creates working vents throughout the back of the hand and palm. Moisture management and ventilation are essential keeping a player's hands cool and dry during play. Don't be fooled by fake vents on other gloves, Warrior is the only company who's got the technology to keep your hands cool under pressure.

## QUADRA CUFF:

The "Quadra Cuff" patented design takes its name from the set of muscles in the lower forearm that it protects. The Quadra Cuff is the small interior wrist cuff that is attached to the glove with elastic bands in a way that feels like it is floating over your wrist without restricting mobility. The cuff has been downsized to allow your wrist maximum bend while still providing maximum protection.

## VENTEX ICEFIL® VAPORTEK LINER:

NEW for the 2011-12 season Warrior is introducing a new way to keep your hands cool in the heat. NEW - VENTEX ICEFIL® Vaportek liner is cool to the touch and works to cool your hands as the temperature increases inside the glove. This new liner also helps wick moisture away from your hands keeping you cool and dry while you play. This technology can be found on the Black N Tan, Regulator, Macdaddy 3 and Elektrick 2 gloves. Slide your hands into any of these gloves and feel difference.

GLOVES

IT'S TIME...  
IT'S TIME TO STEP YOUR GAME UP  
IT'S TIME TO STRENGTHEN YOUR WEAKNESSES AND MAKE YOURSELF BETTER  
IT'S TIME TO DO THINGS THE OTHER GUYS CAN'T DO  
IT'S TIME TO DELIVER WHAT YOU PROMISED  
IT'S TIME TO DOMINATE

*Helmets*

WARRIOR HAS ALWAYS DOMINATED THROUGH INNOVATION, BY PUSHING THE LIMITS ON WHAT LACROSSE EQUIPMENT IS AND WHAT IT CAN DO FOR YOU AS A PLAYER. EVERY PIECE OF EQUIPMENT THAT YOU PUT ON BECOMES A PART OF YOUR GAME, YOUR ATTITUDE, AND YOUR SWAGGER ON THE FIELD. THE TII'S SLEEK APPEARANCE, COMFORTABLE DESIGN AND INSANE LEVELS OF PROTECTION ARE GOING TO PUT YOUR GAME AT A NEW LEVEL AND GIVE YOU A NEW ATTITUDE ON THE FIELD. IT'S PRETTY SIMPLE, IF YOU LOOK LIKE A BAD ASS – YOU ARE GOING TO PLAY LIKE A BAD ASS.

# Protective Series

**PLAYERS CLUB LIMITED:** NEW FOR 2011-2012. EXTREMELY LIMITED – once these pads are gone – they are gone forever. The Warrior Player's Club is the most elite group of lacrosse players in the world. This All-Star cast of professional lacrosse players dominate the game. They are the best of the best: Matt Danowski, Mike Leveille, Nick Polanco, Chris Fiore, Matt Striebel, and Geoff Snider. No expense was spared in the creation of the new Players Club Limited Edition equipment – from the rich & dark premium synthetic leather to the black custom injected molded caps, this series represents the most luxurious equipment ever made.

**NATION SERIES:** NEW FOR 2011-2012. The Warrior Nation Series represents a new breed of lacrosse player. These players run faster, jump higher, and shoot harder - they dominate on the lacrosse field and demand the best in their equipment. The Nation II Series has been updated and improved to deliver some of the lightest high end equipment, with strategic protection where players need it most. Our new Dual Density Compression molded construction gives you 2 different layers of protection in some of the slimmest pads on the planet. All Nation II pads now feature our new VENTEX ICEFIL® Vaportek liner that is cool to the touch and gives you unbelievable comfort in the heat.

**MPG SERIES:** The Millennium Pro Gear (MPG) series has been built to absolutely dominate on the field. These pads feature our VPS (Vented Protection System) that gives you the most venting in any lacrosse pad without sacrificing a single inch of protection. Our new slimmer cap designs gives you targeted protection where you need it most while still maximizing flexibility. It's a no-nonsense series for players that are all business on the field.

**ADRENALINE X1 SERIES:** NEW FOR 2011-2012. The Adrenaline X Protective Series is the next step for young lacrosse players who are ready to take their game to the next level. The focus in this series is to provide quality ultra-protective equipment that fits properly and functions without you even noticing it is there. This series has fully adjustable elastic straps for a custom fit on every player.

**TEMPO ELITE 1 :** NEW FOR 2011-2012. The TEMPO ELITE Protective Series represents quality manufactured, affordable lacrosse equipment for the new lacrosse player. These pads provide the protection and durability that will make you into a true Warrior on the lacrosse field. This series has fully adjustable elastic straps for a custom fit on every player.

# Protective Technologies

## DUAL DENSITY COMPRESSION MOLDING - (NATION)

The new NATION II series features a new technology that allows us to create some of the lightest equipment in the game while maintaining maximum protection throughout the entire pad. Using a process called Dual Density Compression Molding we are able to mold a harder density foam directly on top of a softer density foam. This gives you superior protection on the outside of your pad from hard checks or impacts, but still maintain a soft inside to the pad that is both comfortable and helps disperse impacts. Feel it for yourself, its technology that you can touch.

## VPS (PC LIMITED & MPG SERIES)

VPS stands for VENTED PROTECTION SYSTEM. This technology emphasizes 3 of the most important features in a lacrosse pad, it decreases weight, provides complete airflow venting directly to your body, and finally it gives you complete protection over the entire surface area. This new system allows us to reduce the weight in our equipment by up to 15% without sacrificing protection. The new VPS foams represent a new age in lacrosse equipment and it will allow you to become better, faster, more physical more physical on the lacrosse field. Nothing but complete domination will be accepted.

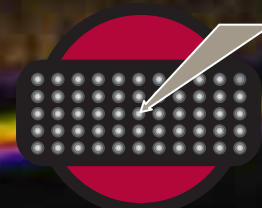

## HITMAN SHOULDER CAPS

Patented shoulder protection – The Hitman shoulder pad system is one of the most advanced protective systems in the lacrosse world. Lacrosse players use their arms a lot... and we don't want big bulky pads getting in our way. The Hitman system solves that problem by providing an insane amount of protection while still allowing a full-range of motion. The shoulder system is built to collapse into itself when you move your arms.

## CLIMAX COMFORT VENTING

Moisture management and ventilation are essential to a player's comfort. Warrior's Climax Comfort Venting is found in our shoulder pads and arm pads. These vents have been strategically placed to create maximum air flow throughout the pads as well as reducing weight and providing increased protection. The air feels so good.

## NON SLIP MATRIX

Arm pads slip... for a long time it was just a fact of life. If the game is on the line and you are cutting for the ball, this is not something that should be on your mind. With the Warrior Non Slip Matrix that is built into our arm pads you can be sure that your arm pads will stay on your elbow, not your wrist. The Non Slip Matrix is a rubberized grip applied to the interior of our pads that grip and hold to your arm. Not slippery when wet!

*No Slip Matrix Feature*

*Limited Edition*
